

# QUALITY AND ENVIRONMENTAL POLICY STATEMENT

Our goal is to be recognized as a symbol of quality in the field of aluminum processing and to supply our customers sustainably produced high-quality products. We understand that sustainable business practices are not just our obligation towards our customers, but also towards the entire society and the environment.

Our vision is to become a eminent supplier to the automotive industry, setting new standards in sustainability and environmental responsibility.

To achieve our goals, we follow these principles:

1. We meet customer requirements and provide them with high-quality and sustainable products that comply with environmental standards.
2. We establish fair and mutual relationships with suppliers, the local community, and other stakeholders.
3. We develop the skills of our employees through training, motivation, and support. We provide our employees job security and opportunities for career advancement.
4. We are committed to best practice examples, promote innovation, and strive for excellence in sustainability and environmental responsibility.
5. We always follow the principle of continuous improvement.
6. We use a process approach and identify and reduce environmental risks at all levels while protecting natural resources.
7. We comply with all legal and regulatory requirements regarding environmental management, as well as the requirements of all interested parties.
8. We systematically reduce the consumption of natural resources, substances, and energy and prevent hazards while reducing environmental impacts.
9. With our sustainable business practices, we contribute to sustainable development and environmental protection.
